

MF Program Action Item

Action Item Number: 2011-106 Date Submitted: 04/28/11 Submitted By: MALS-16

Problem/Project Description:

IMRL requires large amounts of space in order to properly inventory the plethora of equipment that flows through their work center. Many times the equipment will come with many small parts that need to be thoroughly inventoried and assessed. Typically, many of these tasks are performed outdoors in garrison, but is not feasible in forward deployed conditions. Utilizing a double-wide mobile facility with desks/shelving installed on one side would meet this requirement.

Recommendation:

Manufacture a double-wide Mobile Facility similar to the WC-11/WC-12 double-wide, but with two desks, a filing cabinet, shelving, and countertop space in place of the the countertop and flam storage locker of the WC-11/12 configuration.

Status/Course of Action: (Funded Yes No N/A)

06/14/11 - If the MARFORs validate this requirement we can make this happen.
