

MF Program Action Item

Action Item Number: 2011-115 Date Submitted: 04/28/11 Submitted By: MALS-16

Problem/Project Description:

In the 19-600-152-6-1, the APPLICATION section reads "Preoperational checklist maintenance requirements shall be accomplished prior to each use. NOTE: Use is defined as after each setup or complexing." Although this wording provides clarity as compared to the ECU Preoperational Checklists, the existence of the 19-600-152-6-1 creates a requirement for a /52 pre-op card to be maintained on each MF, adding no value to the Mobile Facility Program.

Recommendation:

Request deletion of NA 19-600-152-6-1, all aspects of installation and complexing are contained within AG-360MF-IIN-000, Mobile Facility Site Planning and Installation Instructions. All MF moves, complexing, and de-complexing are performed IAW this manual, eliminating the need for Preoperational Checklist.

Status/Course of Action: (Funded Yes No N/A)

06/22/11 - Site Planning and Installation Instructions do not include "Pre-op" requirements. 6-1 & 6-2 are both required.
