

MOBILE FACILITY PROGRAM REVIEW  
ACTION ITEM

ACTION ITEM NO.: 3-80

DATE SUBMITTED: 01 MAR 2006

SUBMITTED BY: MALS-36 MFC

**PROBLEM:** Protection of MF equipment and personnel in an NBC environment. Is there any equipment available to provide MFs protection in a contaminated environment, such as filters for ECUs, airtight butting kits or seals to protect the personnel and equipment within? Are there any orders or policies that apply to MFs and their application in an NBC environment, specifically protection of and decontamination of MFs?

**RECOMMENDATION:** Develop policy regarding the application of MFs as it applies to NBC. Develop possible safeguards for MFs in an NBC environment, such as special NBC ECU filters.

STATUS: 21 JUN 06

ACTION AGENCY: NADEPNI (Code 48701)

Rejected. During FY-06 (MF) LRG, NADEPNI Code 48701 rejected Action Item 3-80 based on applicable CBRN Policies are presently available to all constituents.
