

MOBILE FACILITY PROGRAM REVIEW
ACTION ITEM

ACTION ITEM NO.: 3-81

DATE SUBMITTED: 03/27/07

SUBMITTED BY: Sgt Neal, MALS-41

PROBLEM: MALS-41 has a lack of adequate storage for doors and other types of miscellaneous MF items. All items are exposed to the high wind and extreme weather.

RECOMMENDATION: Purchase prefab buildings or containers specially made for storing ancillary equipment and gear required to complex or decomplex the MF's.

STATUS: 05/18/07 Under Review.

6/13/07 - PM - Ancillary MFs are available for purchase from the units. It has not been a practice in the past to provide such assets to the fleet. If this is a true requirement and is a serious issue we can research the idea of providing an asset for this use. Keep in mind though, that the program is currently not funded to provide this. This will be discussed at the LRG to evaluate how wide spread this problem is. We can then assess if this is an item that the program needs to budget for.

03/01/08 - Issue dicussed at 2007 LRG. Determined that this is a Facilities Issue. Action Item Closed.

ACTION AGENCY: Mobile Facilities Program Office
