

MOBILE FACILITY PROGRAM REVIEW
ACTION ITEM

ACTION ITEM NO.: 6-37

DATE SUBMITTED: 04/13/07

SUBMITTED BY: MALS-36

PROBLEM: There is no practical means of moving Mobile Facilities intermediate distances. CDT's are used for short distance. MHE used for longer distances.
MALS-36 has been using CDT's to move MFs from the van pad to the repair hangar, approximately 400 meters distance traveled. It is not practical to move the MFs this distance with trucks. Also, MALS-36 is not allowed to forklift MF's along the flight line.

RECOMMENDATION: Design a short distance moving system, such as a road worthy CDT or small trailer for moving MFs intermediate distances.

STATUS: 05/18/97 Assumed by ASL. Fleet voted to remove M1022 and never designated a requirement for replacement. CLOSED No requirement exists.

ACTION AGENCY: ASL-34
