

DFARS -- Part 215

Contracting by Negotiation

13 December 2000

215.470 -- Estimated Data Prices.

(a) DoD requires estimates of the prices of data in order to evaluate the cost to the Government of data items in terms of their management, product, or engineering value.

(b) When data are required to be delivered under a contract, the solicitation will include DD Form 1423, **Contract Data Requirements List**. The form and the provision included in the solicitation request the offeror to state what portion of the total price is estimated to be attributable to the production or development of the listed data for the Government (not to the sale of rights in the data). However, offerors' estimated prices may not reflect all such costs; and different offerors may reflect these costs in a different manner, for the following reasons --

- (1) Differences in business practices in competitive situations;
- (2) Differences in accounting systems among offerors;
- (3) Use of factors or rates on some portions of the data;
- (4) Application of common effort to two or more data items; and
- (5) differences in data preparation methods among offerors.

(c) Data price estimates should not be used for contract pricing purposes without further analysis.

(d) The contracting officer shall ensure that the contract does not include a requirement for data that the contractor has delivered or is obligated to deliver to the government under another contract or subcontract, and that the successful offeror identifies any such data required by the solicitation. However, where duplicate data are desired, the contract price shall include the costs of duplication, but not of preparation, of such data.
