T-45 training system (TS)

The budget request contained \$325.5 million for 15 T-45 aircraft and associated ground training systems, and \$9.6 million for advance procurement of 15 aircraft in fiscal year 2001. The T-45TS, consisting of the T-45 aircraft and ground-based training, replaces the Navy's TA-4J and T-2C as advanced pilot training aircraft. The committee supports the T-45TS but notes unexplained cost growth for engineering change orders. Consequently, the committee recommends \$323.5 million, a decrease of \$2.0 million.
