AV-8B series modifications

The budget request contained \$32.2 million for AV-8B series modifications, but included no funds for the AV-8B engine life management program (ELMP) or for Litening advanced airborne targeting and navigation (AT) pods. The ELMP was developed by the Marine Corps to address the safety and reliability of the AV-8B's engine. The committee understands that increased ELMP funds for fiscal year 2003 would provide more efficient foreign object damage repair capability, improved oil analysis systems, and fuel metering unit revitalization, and recommends an increase of \$5.8

million for the AV-8B ELMP. The Litening AT pod is the next generation Litening pod system that will incorporate an advanced forward-looking infra-red radar and other enhancements to the existing multi-sensor and precision strike capability. The committee understands that the Marine Corps has a requirement for 98 Litening targeting pods but has thus far only procured 66, for a shortfall of 32, and, recommends an increase of \$55.0 million for 32 Litening AT pods. The committee recommends \$93.0 million for AV-8B series modifications, an increase of \$60.8 million, and notes that both of the recommended AV-8B series modification increases are included among the Commandant of the Marine Corps' unfunded priorities for fiscal year 2003.

AV-8B precision targeting pod

The budget request included \$32.2 million for modifications to the AV-8B aircraft but included no funding for Litening II precision targeting pods. The Marine Corps began acquisition of these pods to provide the AV-8B with the ability to use precision-guided weapons. Although no funds were included in the budget request, the Marine Corps has identified buying additional Litening II pods as a high priority item to continue outfitting Marine Corps AV-8B squadrons with this capability. The committee recommends an increase of \$55.0 million for the procurement of Litening II targeting pods, a total authorization for AV-8B aircraft modifications of \$87.2 million.
