Joint Primary Air Training System (JPATS)

The budget request contained \$2.4 million for procurement of JPATS support equipment, but included no funds to procure T-6A aircraft or associated ground-based training systems.

The JPATS, consisting of both the T-6A aircraft and a ground-based training system, will be used by the Navy and Air Force for primary pilot training. The T-6A will replace both the Navy's T-34 and Air Force's T-37B fleets, providing safer, more economical and more effective training for future student pilots.

Despite the Department of the Navy's intention not to continue JPATS procurement until fiscal year 2007, the committee continues to believe that its procurement for the Navy would not only reduce procurement costs for both the Navy and the Air Force but would also reduce operations and maintenance costs.

The committee recommends \$17.1 million for JPATS, an increase of \$14.7 million for T-6A aircraft and associated ground-based training systems.

Joint Primary Aircraft Training System

The budget request included \$2.4 million for the procurement of certain items supporting the Joint Primary Aircraft Training System (JPATS) for the Navy, but included no funding for Navy JPATS aircraft. JPATS is a joint program between the Navy and the Air Force. The Air Force intends to procure 52 JPATS aircraft in fiscal year 2004, but the Navy plans to delay procurement of JPATS aircraft until fiscal year 2007. The committee continues to believe that the Navy should begin to procure the aircraft for the planned joint primary pilot training with the Air Force. The committee recommends an increase of \$35.0 million for the procurement of five Navy JPATS aircraft.
