

Welcome to COGNOS Connection.

Navigation in COGNOS Connection (ver. 8.3) has changed from what you are accustomed to seeing in COGNOS Reportnet. There are also some minor changes in Query Studio. This document will help familiarize you with these changes or added features.

The following pages are screen captures which will help point out the differences you will see.

Filter

Reduce the amount of data in the report. With the Prompt option selected, the filter can be changed each time the report runs.

Filter on: Total Flight Hrs Prompt every time the report runs

Condition: Show only the following

From: 200 Lowest value

To: Highest value

[Missing values](#) (Default)

OK Cancel

Done Trusted sites

The filter can be reopened by clicking on the portion of the filter you wish to modify.

Change the selection from "Individual values in the data source" to "Values in the report". This will change the filter to a summary filter applied to the aggregate value.

- Count
- None

OK Cancel

Done Trusted sites

To add a count to a text field, select the field and select Calculate. Then choose either "Count" or "Count Distinct". Count will give the total non null rows in the field selected. Count Distinct counts only distinct values in that field.

Define conditional styles

Specify one or more alphanumeric values to define ranges or select the values for which you want to define conditional styles. Then specify the style to use for each range or value. You can customize a style by clicking the Edit icon.

Selection: Total Flight Hrs

New value: 100

Insert

Range	Style
Highest value -	Excellent
200	Average
100	Poor
Lowest value -	

OK Cancel Apply

Done Trusted sites

Conditional Styles allow you to highlight a report when certain conditions are met. In this case monthly flight hours > 200 is considered Excellent and < 100 is labeled poor.
