

DASSAULT CATIA/ENOVIA V6 TRAINING
May 20 – 22, 2014

MAY 20 ONLY - Logistics Industrial Complex - 47056 McLeod Road, Bldg 446
May 21 - 22 - 48187 Stanley Road, Bldg 4010

Course information is listed below:

DESCRIPTION:

This course teaches the principle concepts of ENOVIA V6 that are needed for starting an implementation. You will learn how Dassault Systems implements the concepts of PLM 2.0 on the ENOVIA V6 platform. You will get an overview of ENOVIA V6, its architecture components and schema, its customization tools, and its integration with CAD, ERP, and PDM systems. You will also become familiar with various ENOVIA V6 applications (Centrals) and understand how they help you to design and configure products based on captured requirements, define and manage projects, manage BOM lifecycles, finalized the materials to be used for manufacturing and manage RFQs.

OBJECTIVES:

- Identify how ENOVIA V6 fulfills the concepts of PLM and covers the entire lifecycle of a product
- Explain the Dassault Systems' ENOVIA V6 portfolio and packaging
- Identify and describe the ENOVIA V6 architecture components and schema
- Explain how to customize the administrative objectives of ENOVIA V6
- Identify and demonstrate the basic navigation of the ENOVIA V6 user interface
- Describe and explain the use of various ENOVIA V6 applications (Centrals)
- Describe the integration of ENOVIA V6 with various CAD, ERP, and PDM Systems
