- CMIS Web Demonstration

The CMIS supports the configuration, engineering, and technical data management functions of the DoD community with a standard Web Based AIS.

CMIS provides accurate, complete, and accessible configuration data to ensure successful maintenance and operations of DoD weapon systems or tracked assets. CMIS enhances mission readiness and operational capability in measurable terms by providing instant consistent integrated configuration data to operators, maintainers, and logistics personnel.

CMIS is a Joint DoD Application; it is currently fielded in the Navy, Marine Corps, and Air Force. It is being used in NAVAIR to manage aircraft baselines. CMIS currently interfaces with the JEDMICS. Interfaces to the OOMA and the NAVY's ERP systems are currently in development.

CMIS is backed by a dedicated team of programmers, testers, trainers, and process experts to provide customers with the support they need.

User Registration

Joint Service CMIS Customers

Customers requesting access to Joint CMIS systems other than NAVAIR should contact the CMIS Business Office at 240-725-5252.

NAVAIR CMIS Customers

Customers requesting NAVAIR CMIS access must use the NALDA Access Request form or contact the National Help Desk.
