PROBLEM:

EA6B Expanded Mission Maintenance Facility (EMMF) (ie. EMMF-1/2/3) contains Support Equipment (SE) historically maintained via Marine Table of Basic Allowance (TBA)'s and (SE) maintained via Individual Material Readiness List (IMRL)'s. No inventory tracking system is currently identified to control (EMMF) inventories.

DISCUSSION:

RECOMMENDATION:

Identify means of Inventory Controls preferred. Suggest utilize Support Equipment Resources Management Information System (SERMIS)/(IMRL) as basis of inventory management, with consideration for Local Asset Management System (LAMS) as Site-Management tool. LAMS (Serial Number tracking capability).
