

ACTION ITEM NO: 2-143

DATE SUBMITTED: 19 JUL 98

SUBMITTED BY: MALS-31

PROBLEM:

Standardize Mobile Facility (MF) Inventory and TALPS Consolidated Computer Program.

DISCUSSION:

There is a great disparity among the various MALS as to the fields incorporated in the MF inventory programs maintained. In addition, importation capabilities of TALPS is inactive and does not take into account the partial loading or advent of a composite MALS aboard the T-AVB.

RECOMMENDATION:

Request the computer program be established utilizing \*.dbf files as MF standard for MF inventory and statistics, and incorporate TALPS data. The purpose is to allow easy integration of the existing TALPS program and Fleet wide standard for MF program accountability and information.

Closed. The Logistic Review Group (LRG) Steering Committee held at JRB Ft. Worth, Texas on 29 Jul 98 request refer to Action Item No. 2-141.
