

MOBILE FACILITY PROGRAM REVIEW
ACTION ITEM

ACTION ITEM NO.: 2-184

DATE SUBMITTED: 04/21/08

SUBMITTED BY: ASL-34

PROBLEM: MALS-26 and ASL-34 do not like the current design of "CASS RT TPS Support" MF configuration KA-14, based on the six cabinets shelves. MV-22 TPSs are delivered on hardened cases. There are (x9) KA-14s delivered to RW MALS/HMX-1. There are (x55) KA-15s delivered to FW MALS for Big Blue CASS TPS support. There are (x10) KA-16s delivered to FW MALS for EO TPS support.

RECOMMENDATION: ASL-34 desires to have standardized TPS Support MF that is fielded for all RT-CASS and RT-CASS High Power MFs.

STATUS: 04/21/08 ON HOLD--Need a valid Facilities Requirements Document (FRD) and rudder from ASL-34 via PMA-260.
05/29/08 Put a survey on website so Fleet can provide input.
01-29-09 KA-31 prototype in build.
05/21/09 CLOSED, MF delivered to MALS-31

ACTION AGENCY: MF Program Office
