

# MF Program Action Item

**Action Item Number:** 2011-104 **Date Submitted:** 04/18/11 **Submitted By:** MALS-11 MFC / GySgt D.A. Porter

**Problem/Project Description:**

MALS-11 GSE states that they no longer require their Lead Acid Battery Mobile Facility LA-01 to charge their batteries for the 900 Support Equipment Division in CONUS and while deployed. MALS-11 QA has approved the 900 division to utilize battery tenders (Part Number: 022-0157-1) to charge batteries fulfilling their battery charging maintenance requirements. The battery tenders can be used on the batteries while they are still in their respective support equipment, eliminating the need for a mobile facility required for charging batteries. IAW the NA17-15BAD-1 Battery manual, the Optima batteries do not require a dedicated maintenance facility anymore.

**Recommendation:**

Remove the TBA allocation for GSE/900 Division Battery Mobile Facilities (LA-01).

**Status/Course of Action:** (Funded  Yes  No  N/A)

06/14/11 - There remains one SLAB within the GSE that has a deployment requirement. I recommend developing COAs to have 600 support this single SLAB with chargers provided by 900.

06/28/11 - ASL-34 states problem is bigger than one SLAB, more info to come.

**Action Agency:** ASL **Assigned To:** MGySgt McCutcheon/Clinger **Date Assigned:** 06/14/11

**Est. Completion Date:** 12/31/11 **Act. Completion Date:** \_\_\_\_\_ **Closed By:** \_\_\_\_\_
