

MF Program Action Item

Action Item Number: 2011-107 Date Submitted: 04/28/11 Submitted By: MALS-16

Problem/Project Description:

Inventories in each LIR vary greatly. Some inventories go into great depth, listing every item while others are extremely vague, listing only major components in the MF.

Recommendation:

Create a standardized and detailed inventory for each MF Configuration and add as an appendix to the AG-360MF-CCD-000. Legwork for creating the new inventories can be performed at the MALS level. Once a final listing is compiled, forward to all MALS for validation/verification. Upon approval from all MALS MFCs, forward to Program Office for approval.

Status/Course of Action: (Funded Yes No N/A)

05/17/11 – PO in work on standardization of LIR process for MFCS'. Like configuration inventories should mirror between sites. LIRs will be posted to MyNAVAIR when completed by configuration site (not attached to CCD manual).
