

MF Program Action Item

Action Item Number: 2011-120 Date Submitted: 05/12/11 Submitted By: MALS-14/ GySgt Gibson

Problem/Project Description:

MALS-14 requisitions for old light ballast P/N 6G1020AG90 (reference NA19-25-177 WP 007 Pg 55 It#8A) continue to get cancelled. Upon research, MALS 14 Supply shows these ballasts are no longer procurable. Checking in webflis (http://www.dlis.dla.mil/webflis/pub/pub_search.aspx) shows the following NSN 6250-00-892-5248 with an acquisition code "V" which states; 'terminal item, future procurement not authorized. Requisitions may continue until item exhausted.'

Recommendation:

Update NA19-25-177 (R/R procedures, IPB) to reflect the newer 2-tube electronic ballasts that can be used to replace the older Lithonia magnetic ballasts, provided the older T12 fluorescent tubes are replaced with T8 tubes at the same time.

2-tube electronic ballast: part # B232IUNVHP-B, NSN: 6250-01-508-4527.

T8 fluorescent tubes NIIN: 01-447-3469 (32W, T8 type, 48-inch).

Status/Course of Action: (Funded Yes No N/A)

06/22/11 - 1) Plan is to include part number, schematic and instruction during revision of the NAVAIR 19-25-177 on next cycle (FY12). Interim resolution will be an IRAC for near term use.
2) 4 lamp Lithonia fixture will also be addressed in this update.
