

MOBILE FACILITY PROGRAM REVIEW  
ACTION ITEM

ACTION ITEM NO.: 5-45

DATE SUBMITTED: 04/01/09

SUBMITTED BY: MARFORCOM

**PROBLEM:** Mobile Facilities Configuration Manual, AG-360MF-CCD-000, requires updating. Basic date of manual is 4/1/1990 with no changes or updates incorporated since publication. Essential information critical for resource and configuration management is contained in this publication however, newer MF configurations have not been added. This manual is of particular importance with regard to the identification of all non standard equipment installed within each configuration.

**Note:** The configuration drawings maintained on the MF website are helpful, however the drawings do not contain a key for the numbered callout items which correspond to the part number/ nomenclature / description of installed equipment.

**RECOMMENDATION:** Update AG-360MF-CCD-000

**STATUS:** Accepted and in process. MFPO, NAWCLAKE and CSS have continued efforts to revise manual. Final review held 13 May. All issues resolved. Anticipate document of NATEC NLT 15 June. Config Manual posted to the NATEC website, <http://www.navair.navy.mil/logistics/techDataPack/techManual.cfm>, Naval Message CNASC 301619ZJUN09 notifies AIG 11198 of the same. Action Item is CLOSED.

**ACTION AGENCY:** MF Program Office
