

MOBILE FACILITY PROGRAM REVIEW
ACTION ITEM

ACTION ITEM NO.: 6-56

DATE SUBMITTED: 6/16/2010

SUBMITTED BY: MALS-31 (Capt Costa, GySgt Mrusek, Sgt Stuempert)

PROBLEM: ECU-130 usage vice MMG-1A or like item

RECOMMENDATION: Modify the JU-01 MF or the 400Hz MF requirements to allow the capability to hook up an ECU-130. Give each MALS a TBA allowance of 30-35 ECU-130s and then depending on which complex the INU (JU-01) is powering, you have the capability to provide 400Hz. This would reduce and potentially alleviate the need for the MMG-1A. It would be easier to deploy and it would be completely out of the elements. This will all be driven, of course, based on power draw from the MFs hooked up to that particular INU.

STATUS: 7/16/2010 - Accepted
