

NAS Pax River workforce

22,200+

If each of the 22,200+ workers turns off only one light or their computer at the end of each work day, imagine how much will be saved in energy costs...

Help the Navy reduce energy costs, turn off lights when rooms are no longer occupied and your computer and surge protector at the end of each work day.

Thanks for doing your part to make our workplace more financially efficient.
