

## THE NAVAL AIR WARFARE CENTER TRAINING SYSTEMS DIVISION (NAWCTSD)

The Navy's principal center for modeling, simulation, and training systems technologies.

*The Center provides training systems development for a wide spectrum of military programs, including aircraft, surface ships, submarines, and specialized requirements.*

*Formed in 1941 as the nation's first military simulation developer, NAWCTSD serves as the Navy's Technical Center of Excellence in Research, Development, Acquisition, On-Site Testing, and Sustainment of Training Solutions. These solutions are provided in four product lines: Training Systems, Training Content, Training Services, and Intellectual Services.*

**We have one of the most skilled groups of Sailors, scientists, technicians, and support personnel in the world.**

*Through front-end analysis and curriculum development, NAWCTSD integrates the science of learning with performance-based training applications and evaluation of training effectiveness.*

Located in Orlando's Central Florida Research Park, the Center employs about 1,200 engineers, scientists, and support personnel.

NAWCTSD not only crafts simulation technologies for the Navy, but is often an integral contributor to simulation development for the Army, Air Force, Marine Corps, and Coast Guard, as well as many Federal, state, and local agencies.

Its location in Central Florida gives the Center the advantage of being co-located with other military research and development organizations, the University of Central Florida, and being near the center of the simulation-based entertainment industry.

The Center's advanced laboratories and highly skilled workforce, working from this unrivaled technology base, continue to produce cutting-edge advances in training simulation and human performance.

NAWCTSD awards an average of over \$1 billion in contracts to training technology companies each year. We have one of the most skilled groups of Sailors, scientists, technicians, and support personnel in the world, working in areas of emphasis including:

- Aviation
- Naval Surface & Undersea Warfare
- Cross-Warfare
- Foreign Military Sales
- Research & the Science of Learning
- Live Virtual Constructive
- Cyber
- Modeling & Simulation

## OUR MISSION

To be the principal Navy center for research, development, test and evaluation, acquisition and product support of training systems, to provide inter-service coordination and training systems support for the Army, Marine Corps, and Air Force, and to perform such other functions and tasks as directed by higher authority.

## OUR VISION

To be the provider of choice for training and human performance solutions that enable and enhance the capabilities of our Nation's Warfighters.
