

NAWCTSD Emerging Technologies

NAVAL AIR WARFARE CENTER TRAINING SYSTEMS DIVISION ORLANDO FLORIDA

EXHIBIT FACT SHEET

NAWCTSD Emerging Technologies

The Naval Air Warfare Center Training Systems Division (NAWCTSD) is exploring current and future technologies to address the training needs of its civilian and military personnel and to showcase our products and services. Of great interest to NAWCTSD is the possibility of utilizing virtual worlds to create immersive training environments and using mobile technologies to distribute information and training content.

Products and Services Island: NAWCT3D

The NAWCTSD Products and Services Virtual World (known as Naval Air Warfare Center Training in 3 Dimensions (NAWCT3D)) utilizes the Second Life Virtual World to experience the products and services developed by NAWCTSD and attract the attention of highly skilled potential future employees.

While "in-world", your avatar can observe information regarding Aviation, Surface, Undersea and Cross Warfare Directorates. For each of these directorates, avatars have the ability to explore training simulators such as the F/A-18 aircraft cockpit which simulates training as an aviation pilot; experiencing fire and smoke in a virtual version of the Navy's Battle Stations 21 Simulator, and observing a submarine undersea training system called MRTS (Multi-Purpose Reconfigurable Training System). NAWCTSD is very proud of our products and services, which are critical to providing solutions to enhance the capability of the nation's Warfighters.

The Quality of Life and the Quality of Work for NAWCTSD employees is of great importance to the NAWCTSD leadership and NAWCT3D most definitely reflects this! While in-world your avatar can explore many of the quality of life activities available such as a fitness gym where your avatar can run on a treadmill and lift weights. You may also want to gather a team of avatars and play a game of beach volleyball or you may want to explore the many educational opportunities available to our workforce.

Acquisition Integrated Product Team (IPT) Virtual World

The area of utilizing virtual worlds and social networks for education is a relatively new concept that NAWCTSD believes can directly enhance its Acquisition, Technology & Logistics (AT&L) workforce. However, there are new innovations necessary in order for these capabilities to reach their potential. As part of NAWCTSD's path to the next generation learning environment, we have developed a persistent collaborative virtual environment to train our acquisition workforce on:

- ◆ Establishing, leading, and managing Integrated Product Teams (IPTs)
- ◆ Developing IPT Charters
- ◆ Writing sections of an Acquisition Plan
- ◆ Writing marketing survey questions
- ◆ Practicing conflict resolution
- ◆ Identifying potential risks related to performance or technical areas, cost, and schedule
