This list provides general information on current NAWCWD contract awards. The list is not intended to be a complete list of all contracts. Its purpose is to provide small business concerns with information on the types on services and commodities currently under contract to assist them in their efforts to become government prime contractors and subcontractors.

For some contracts the total award may be a not-to-exceed amount. These amounts are based on the Government's maximum expected need at the time of award. The actual obligated dollars may be less.

Market research for follow-on requirements generally begins 18 to 24 months before the end date of the current requirement.

You may review our current requirements and awards at the Federal Business Opportunities (FedBizOpps) website - www.fedbizopps.com

A complete list of all contracts can be found in the Federal Procurement Data System - Next Generation (FPDS-NG). Under "Standard Reports" select "Federal Contract Actions and Dollars" using the Organizational Code "NAVAIR NAWC WD" and download the details. DOD information in this system has a 90 day delay for reports run by the general public.
