

SBIR / STTR

Effective October 1, 2025, legislative authority for the SBIR and STTR programs has expired, and without reauthorization, the Department of the Navy SBIR/STTR Programs have limited authority to operate. Activities are impacted as follows:

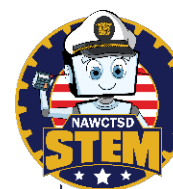

- No new Department of War solicitations/topics will be released. FY26 solicitation releases (pre-release, open, and closing) dates will be clarified following program reauthorization.
- The September 2025 (Release 12) topics will remain in the pre-release phase until the programs are reauthorized. Topics will open on the first Wednesday following program reauthorization. Closing dates will be extended accordingly to maintain a four-week open period for proposal submissions.
- Active awards remain valid, however incremental funding or other modifications could be delayed.
- Only proposals selected from solicitations issued prior to program lapse may be awarded.
- Phase III opportunities are still available if proposed to and/or awarded under FY2025 or prior authority.
