

# Ready Relevant Learning

David Kemp  
Portfolio Mgt Director, RRL  
PEO MLB  
December 2024

# Portfolio Overview

## MyNavy HR IT Solutions

HR IT Solutions portfolio delivers critical capabilities used by active and Reserve forces, civilians, retirees and Navy families 24/7 around the world. Our solutions and services empower Sailors to manage their careers from Hire to Retire

**Capabilities:** Workforce Development Personnel Management, Recruiting and Accession, Distribution, Financial Management, Organizational Management, Fleet and Family Support

## Naval Applications and Business Services

Provide enterprise and business applications in a Joint, diverse portfolio using best practices to accelerate capability delivery

**Capabilities:** Business Intelligence, Reporting & Analytics; Foreign Military Sales Case Management; Information/Data Management; Legal Case Management; Naval Capability Investment Optimization; Risk Assessment & Management

## Ready Relevant Learning

Provide Sailors with world-class training when and where they need it so they can operate and maintain their equipment at the extreme technical end of its capability to win the high-end fight

### Capabilities:

LOE 1: Learning roadmaps that link requirements w/real-world Fleet needs  
LOE 2: Modernized content with multiple delivery options  
LOE 3: Reductions in cost and time to get relevant training to the Fleet

## Navy ERP Financial IT Services

Modernize and deliver business-critical auditable solutions & services for financial, time/attendance & supply chain management.

**Capabilities:** Financial Management; Procurement; Workforce Management; Program/Project Management; Business Intelligence, Reporting & Analytics; Grants Management; Supply Chain Management

## Marine Corps Manpower IT Systems Modernization

Modernize recruiting and retention capabilities, and Develop an AI/ML, Initiate Generative AI / Large Language Models per Talent Management 2030

**Capabilities:** Force Readiness; Modeling & Data Analytics; Talent Marketplace / Management; Manpower Management & Assignments; Retention & Recruiting; Training & Education; Pay & Personnel; Deployment Planning; Medical Readiness & Health Records Management

## Logistics IT Services

Modernize 200 Navy IT systems into a single fully interconnected ecosystem of maintenance, supply, and product lifecycle applications deployed both ashore and afloat.

**Capabilities:** Product Data Management; Maintenance; Supply; Data Alignment and Analytic Support; Aviation and Maritime Readiness

## Marine Corps Logistics Integrated Information Solutions

Deliver and sustain modernized solutions to enable logistics operations to the tactical edge and enhance logistics capabilities to improve operations in denied and degraded environments

**Capabilities:** Automated Supply Chain Management, Ground Equipment Asset Visibility/Lifecycle Management, Supply Warehouse Management, Transportation Planning and In-Transit Visibility, Operating in austere environments

Providing the foundational systems to man, train, and equip the modern Navy and Marine Corps

# What is Ready Relevant Learning?

RRL is the Navy's long-term investment in improving individual Sailor performance and enhancing Fleet readiness. The goal of RRL is to deliver modernized training at the right time at the point of need, so Sailors are ready to operate their equipment at the extreme technical end of *its* capability to win the high-end fight.

The Ready Relevant Learning (*RRL*) Portfolio Management Office (**PfMO**) is one of several portfolios of the *Program Executive Office for Manpower, Logistics and Business Solutions* (**PEO MLB**). The *RRL PfMO* is responsible for overall acquisition management of the RRL IT and training solutions. These responsibilities ensure interoperability of training solutions, IT integration, and resource sustainment management.

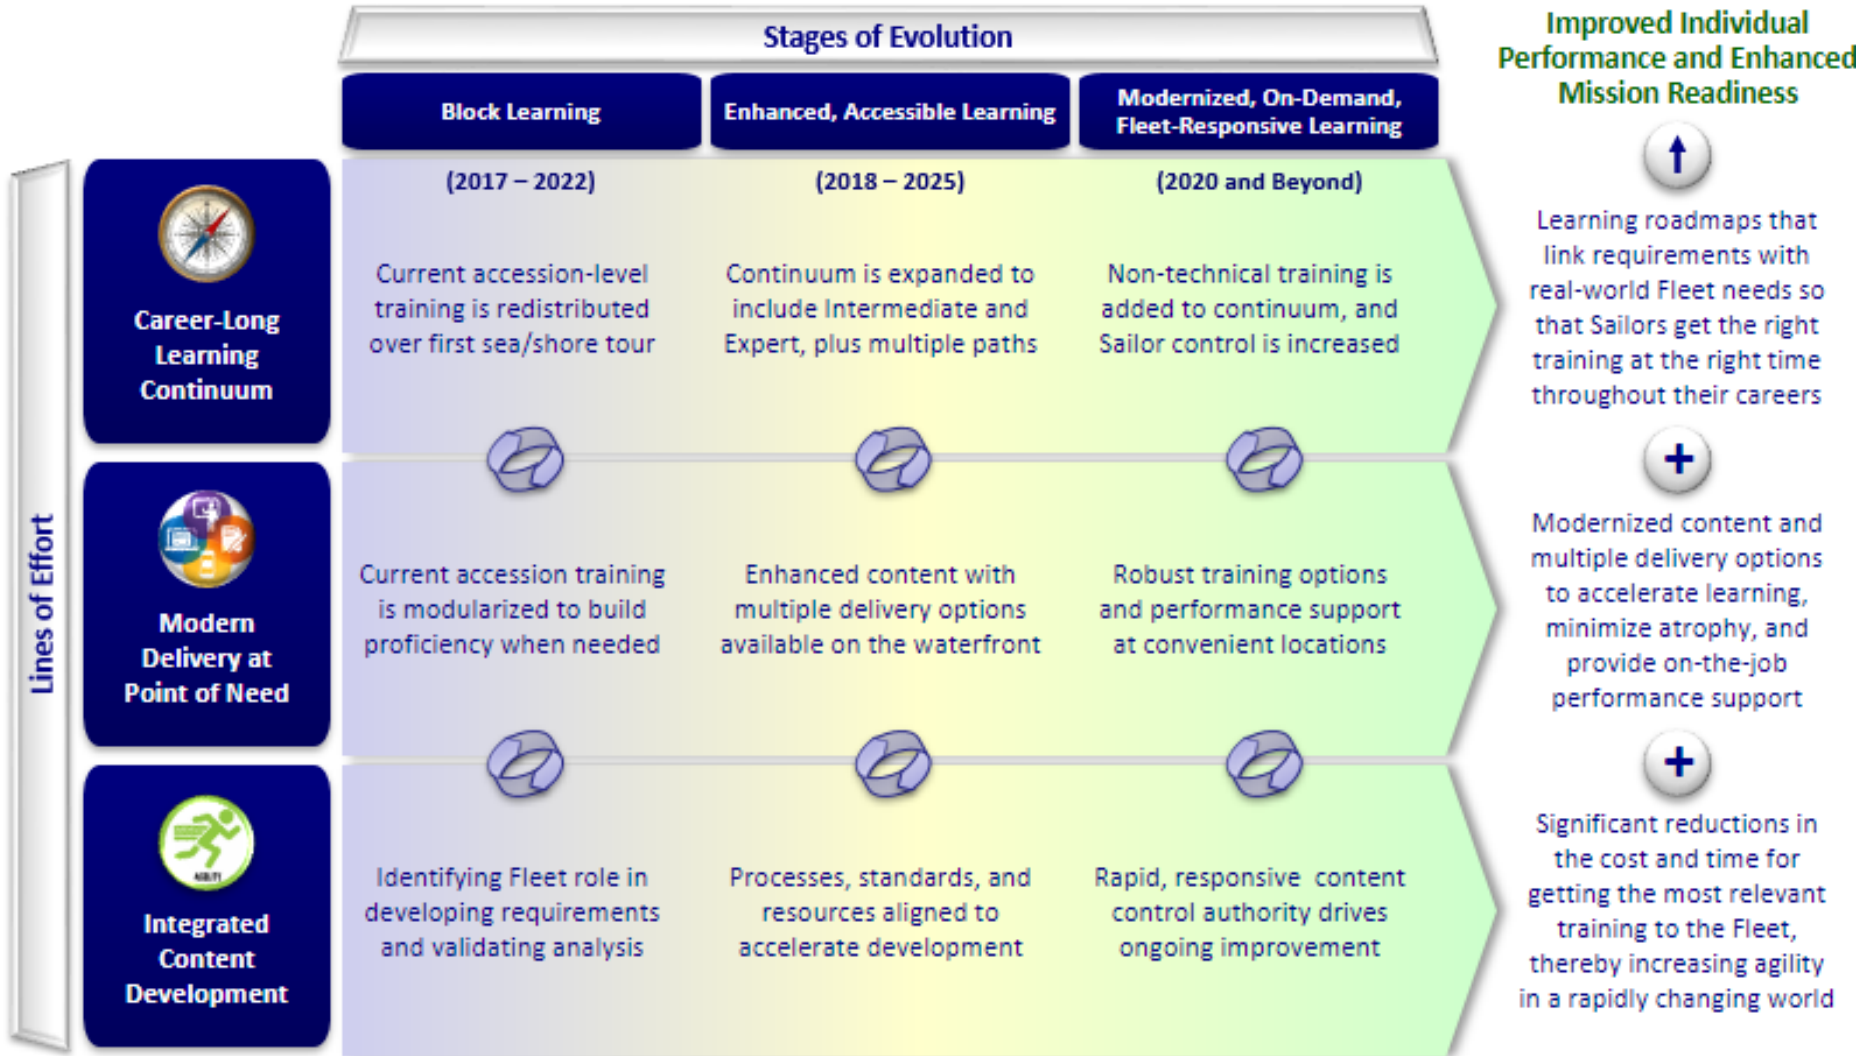

Using a single portfolio manager construct, the RRL PfMO functions as the **end-to-end integrator** for RRL, identifying and resolving gaps and seams within and between RRL and other Navy training initiatives.

## VALUE TO THE DON:

- **Provides** the right training at the most optimal time for Sailors throughout their careers
  - **Accelerates** learning, minimizes atrophy, and provides on-the-job performance support
- **Reduces** the cost and time for getting the most relevant training to the Fleet

# RRL 3 Lines Of Effort

# Ready Relevant Learning Outcomes

**Delivering Training to Sailors When and Where Needed-** The Multipurpose Reconfigurable Training System (MRTS) 3D<sup>®</sup> tested for the first time on a Navy ship, USS Abraham Lincoln (CVN 72).

**Improving Instructional Techniques-** These 3D-printed torpedo tubes at the Submarine Learning Center and 3D-printed Medium Tactical Vehicle Replacement transfer case at the Center for Seabees and Facilities Engineering allow students to see life-sized or larger-than-life examples of what they will be operating / maintaining.

**Increasing Reps & Sets-** This RRL-funded Ford Powerstroke diesel engine rack allows Sailors additional practice on actual equipment.

**Leveraging Gamification-** This Virtual Reality scenario places prospective Aviation Boatswain's Mates on the Flight Deck, versus practicing in a schoolhouse parking lot.
