14bis Supply Tracking	https://14bis.aero/	6519 Sewanee Avenue		Houston	TX	77005	Service Disabled Veteran Owned Small Business, Woman Owned Small Business	511210, 541511, 541512, 541614	14bis Supply Tracking provides physical and digital asset tracking with proprietary middleware leveraging tested and secure blockchain technology as a secure interoperability layer: able to read any existing tagging mechanism and automatically update any existing industry software system. The result is real-time supply chain transparency and immutable lifecycle provenance tracking. For physical assets, 14bis provides supply chain industries with instantaneous physical asset situational awareness enabling minimization of carried inventory costs. For digital assets, 14bis ensures that clients can be Industry 4.0 ready, specifically integrating with 3D printing or IoT systems. For procurement, accounting and quality control, this allows for greater control of data and trust.	Eleanor Mitch	713-574-2246		em@safeflights.io

The quality of our work is largely the result of a mature quality system and an FAA-Approved training program. Technicians are certified to IPC-771/7721 and JSTD 001 standards. Using diagnostic tools and calibrated measurement devices, we perform regular "health check ups" on our equipment to verify equipment operated by AMS employees is accurately calibrated and properly functioning. These voluntary practices and a training matrix for each technician per job description are managed and implemented within our Quality management system. We monitor delivery times and quality levels of our services. AMS is ANAB accredited, ITAR compliant, and registered through the DDTC for Export compliance. FAA Air Agency Certificate #OKQR412Y. Anatomical Architects, Inc.	http://www.cervifit.com	3860 W. Commercial Blvd.		Ft. Lauderdale	FL	33309	Small Business	339920	Anatomical Architects is the exclusive manufacturer of the Patented CerviFit Neck Strengthening System. According to a 2004 Swedish Air Force study, cervical discomfort is common among pilots of high performance aircraft. An exercise program was introduced to increase the strength and endurance of the neck muscles represented by a reinforced training program. The study found the reinforced training program increased the strength and endurance of the appropriate muscle groups. Another study published in 2005 concluded "to protect and stabilize the head and neck in high Gz environments, higher neck muscle strength is needed". The CerviFit is manufactured in the United States and has undergone Electromyography studies at Nova Southeastern University, which concluded, "that this device can define or improve the musculature of the neck". Boundless Spatial, Inc.	https://boundlessgeo.com/	222 Broadway	19th Floor	New York	NY	10038	Small Business	511210, 518210, 541360, 541370, 541511	Boundless develops and maintains the world's premiere open source GIS ecosystem. It is a complete GIS platform that exists on the Desktop, Server, on Web & Mobile devices, and in the cloud. It enables a feature-rich, enterprise GIS without the high licensing costs associated with proprietary software and resolves the challenges of single vendor lock-in, increased costs for scaling architecture up or out, and lack of interoperability with existing software and hardware. Rather than rip-and-replace existing proprietary software for open source, Boundless works with organizations to develop and implement hybrid architectures of both proprietary and open source software. Boundless provides commercial support and maintenance for the ecosystem, enabling proven and powerful open source software to run in operational environments. In addition to software products, Boundless provides classroom training and professional services to get you up and running quickly and easily. CCUSA Inc		5570 Florida Mining Blvd. S.	Unit 101	Jacksonville	FL	32257	Small Business, Small Disadvantaged Business, Woman Owned Small Business	333999, 493110, 624221, 624230, 621493	Carcoon USA's (CCUSA) primary offerings consist of inflatable structures that are vacuum-sealed, air-tight and can be rapidly deployed for a number of key applications. They are configurable in a wide range of sizes, and may be of interest on the aviation side - particularly if USN has a need to better protect air assets from corrosive elements (such as sea-spray and sand) often found in harsh operating environments where low signature storage is necessary. In fact, current Carcoon customers in the commercial helicopter industry have noticed considerable cost savings in maintenance and asset sustainment from using these platforms.	William H Thompson	202-546-2263		wthompson@charlesgroupdc.com

Centrify Corporation	http://www.centrify.com	3393 Octavius Drive	Suite 100	Santa Clara	CA	95054	Small Business	423430, 511210, 541512, 611420, 517210	Centrify's Unified Identity Services centrally manages identities across data center, cloud and mobile to optimize cost, agility and security. Unified Identity Services include integrated authentication, access control, privilege management, policy enforcement and compliance. The net result is one single login for users and one seamless identity infrastructure for IT. Managing identity is hard to do in a traditional data center comprised of heterogeneous systems and applications. Throw into this mix the additional identity silos introduced with new cloud and mobile platforms, and it becomes even more difficult to ensure that critical IT compliance and security tasks such as de-provisioning user access, running compliance reports and managing privileged user access are easily and fully implemented. Another significant challenge arising from the adoption of cloud and mobile platforms is the increasing burden on end-users to keep up with all the URLs and passwords they need to... DroneTechUAV	http://www.dronetechuav.com	9901 IH-10 West	Suite 800	San Antonio	TX	78230	Small Business, Small Disadvantaged Business	336411, 336413	Due to the influx of low-quality unmanned-aerial-vehicle (UAV) platforms from overseas suppliers, it is challenging for organizations to choose the appropriate unmanned-aerial-system (UAS) (Drone). Single-purposed "boxed" UAV platforms rarely provide the desired mission performance and return on investment. Our adaptable aircraft air-frames in both classes will allow you to re-purpose the same aircraft daily and within an hour without the day-to-day inefficiency associated with a single-purposed aircraft. DroneTechUAV aircraft customization services will provide you with the turnkey guidance to guarantee a successful ownership experience. All of our autonomous aerial solutions are designed and fabricated in San Antonio, Texas USA.	José Alfonsin	210-201-1163		jalfonsin@dronetechuav.com

EMAGENIT Excel Training & Software Design	http://www.emagenit.com	2060 East Avenida De Los Arboles	D135	Thousand Oaks	CA	91362	Small Business	611420	Since 1998, EMAGENIT (Imagine-IT) has provided general Microsoft Excel training, Microsoft Excel VBA training and Excel software design for business, engineering and science. We have worked with the US Navy before providing Excel training in Naval Base San Diego and Naval Base Ventura County (Point Mugu) and have designed Excel software for NAWCWD China Lake. Our Excel training covers basic Excel topics to the most advanced Excel VBA topics. We provide public workshops, live online courses and onsite training. We have vast experience in the areas of data analysis, data fusion and data mining. EMAGENIT's founder, David Hooper, is an Excel trainer and was a flight test engineer for the US Air Force C-17 CTF. In our Excel software design, we use VBA for cost effective solutions. In addition to VBA, we also use .NET, ASP, JavaScript, FORTRAN and HTML to build hybrid Excel software tools that reach out to the internet, perform multi data source integration and program fusion. Enduralock	http://www.enduralock.com	14847 W. 95th St.		Lenexa	KS	66215	Small Business	332722	Enduralock provides custom fastener engineering solutions for high vibration environments. The fasteners are permanently locking but reversible and reusable with a standard socket. An accurate preload can be determined, as the nut is free spinning with the socket applied. With removal of the socket, the fastener permanently locks.The fastener's ease of installation, reversibility, and reusability with standard sockets provide for reduced time and cost of installation and maintenance. The National Aerospace Standard 1312-7 requires a self-locking nut to withstand 30,000 cycles of vibration. Enduralock's fasteners have withstood 300,000 cycles (10 times the industry standard) without loosening.	Harold Hess	913-214-9911		hhess@enduralock.com

Georgia Sustainment Solutions, INC.	http://WWW.GSSINC.BIZ	193 highway 91 SW		Newton	GA	39870	Small Business	336412, 336413, 336370	Georgia Sustainment Solutions, Inc. is a privately-owned small business with corporate headquarters in Newton, Georgia, and offices in Indiana and Alabama. We work in partnership with our customers in the military, industrial and commercial industries to provide long-term support against obsolescence. Maintaining an aging fleet is a logistics challenge, and our expertise is in maintaining a parts stream to support field and depot-level maintenance operations. With more than 50 combined years of experience in the aerospace and defense industry, we are highly proficient in the fields of logistics, procurement, quality assurance, maintenance and manufacturing. We maintain an extensive database with drawings for aged aircraft and land-based weapon system parts.	Danny Jones	229-881-9980	866-613-7590	djones@gssinc.biz

Giga-Tronics Incorporated	http://www.gigatronics.com	4650 Norris Canyon Road		San Ramon	CA	94583	Small Business	334515, 334413	Giga-tronics Incorporated produces instruments, sub-systems and sophisticated microwave components that have broad applications in both commercial communications and defense electronic systems. Giga-tronics Incorporated consists of three primary product areas: Test and Measurement Instrumentation, Signal Switching Solutions, and Microwave Components and Assemblies. Our latest design and engineering efforts have resulted in a modular, high performance, coherent fast-tuning synthesizer that can also be used as a broadband coherent up-converter/down-converter to provide COTS building blocks for 5th Generation Target and Threat generation. This can be easily scaled for multi-channel operation to produce fine resolution wave fronts for DF or RWR test applications or for multi-port high density threat emitter environments. We also offer a COTS Threat Emulation Simulator software package that allows for user defined complex emitter modes and complex scenario generation using COTS HW. IDSI	http://www.idsilc.com	888 Far Hills Drive		New Freedom	PA	17349	Small Business	334220	IDSI is a premier provider of broadband high-power RF and microwave amplifiers to the military. IDSI prides itself in designs that are customized to meet end-user requirements while maintaining sensitivity to size, weight, and power (SWaP) considerations. IDSI is a small business that provides quality, cutting edge solutions based upon proven proprietary techniques on a timely basis. IDSI has been the supplier of choice for RF power amplifiers on all three of the major JTRS Cluster programs (GMR, HMS, and AMF), and holds a soul source position with many of the current prime contractors in the Electronic Warfare (EW) market segment	David Pedersen	717-940-4982	717-227-4444	dpedersen@crescendtech.com
iGov	http://www.igov.com	9211 Palm River Rd	Suite 110	Tampa	FL	33619	Small Business	541519, 334111, 334220, 339999, 517911	iGov is a trusted Lead Systems Integrator, specializing in tactical and expeditionary C4I systems. We have executed contracts for USSOCOM (2005 to present), the U.S. Marine Corps (TCWS and COC Modernization), and the U.S. Air Force (PEITSS). Headquartered in Reston, VA, we have an 82,000 sq ft TS-cleared facility in Tampa, FL that includes 4,100 sq ft of open, classified storage. The Tampa facility houses all R&D, engineering, integration/production, sustainment, logistics, and programmatic activities. From a one-of-a-kind wearable communications solution and the latest TACLAN baseline for USSOCOM, to vehicle platform integration for the USAF, our engineering expertise has resulted in significant SWaP reductions and increased capabilities for the warfighter. Isodyne Inc	http://isodyneinc.com	7706 E osie		Wichita	KS	67207	Woman Owned Small Business	334417, 334220, 334290, 334513, 334310	Isodyne develops and manufactures a patented Tool-Less Braid Termination System for EMI back shells specifically designed for wire harnesses requiring shielding for EMI/RFI or HIRF and lightning protection. Both individual shields and overbraid are terminated at the backshell with one band improving electrical performance and also allowing for ease of re-entry. The band can be removed and replaced allowing for easy repair/upgrade of the system without the need for calibrated tools or additional bands. This design has been in use since 1990 and is used in thousands of interconnects on land-based systems such as General Dynamics M1/A2 tank. Because of the conforce springs inherent memory in high shock and vibration applications, the spring continues to tighten, thus increasing reliability and electrical performance. For these reasons Isodyne EMI back shells are used on most military helicopters, including Boeing's CH47F1, fixed wing aircraft such as the C130, RC-135 and EA-2D Advanc	Todd Friedman	334-655-0462	316-682-4126	tfriedman@isodyneinc.com

Laser Aviation	http://laseraviation.com	1954 Airport Rd	Suite 123	Atlanta	GA	30341	Service Disabled Veteran Owned Small Business	488190, 541330, 541340, 541360, 541490	We create exact 3-D laser images for fleet operators, individual aircraft owners, special operations modification and completion MRO's, DER's, OEM's or the rare aircraft restorer's. Once the data is collected Laser Aviation transforms that point cloud data into a 3-D solid model. The resulting files are exported as STEP, IGES, or ParaSolid files, as well as other file formats. The digital models are created so precisely that the FAA and the OEM's are relying on this type of documentation more and more. The 3-D models establish the baseline for repairs and enables engineers to more precisely prescribe a course of action. Once captured, the information can easily be shared with suppliers, customer's, and others worldwide via the internet. The digital files are also relied upon to capture existing conditions of the aircraft for future reference and establishing a base line of an individual airframe.	Mike Mullett	954 547 4406		mhm@laseraviation.com

Our focus in implementing SAP capabilities that focus on building a solid foundation of product data from which NASA can leverage the new integrated solutions SAP is releasing. Our benefit id bringing real world industry knowledge and experience to NASA in the form of processes, best practices and products that make the SAP experience easier and more efficient. We bring integrated products that have been created based on years of customer experience that are simple to use, flexible very efficient and that will bring immediate value to NASA at a very reasonable cost. Product data are the jewels of any organization and how that data is managed, secured and used determines how successful you will become. LeverX can help you manage your product data in SAP throughout its lifecycle and bring immediate returns on your investments.	Peter Demtschenko	585-737-5255		peter.demtschenko@leverx.com
Lexycom Technologies Inc.	http://www.lexycominc.com	425 S.Bowen Street	Unit 7	Longmont	CO	80501	Small Business	34220, 541712	Lexycom Technologies Inc. is a small business that has been designing and manufacturing Software Defined Radio (SDR) transceivers for industrial, commercial, and government applications since 2004. Our product line features a variety of miniature software defined radios in the 900MHz, 1.3GHz, and 270-400MHz frequency bands.To the best of our knowledge, our products are the smallest SDRs on the market. The off-the-shelf transceivers deliver user-configurable over-the-air data rate from 9.6kbps to 1.3Mbps, andutilize a variety of modulation types (nPSK, SO-QPSK, nFSK, MSK, etc.). PEAKE	http://www.peake.com	846 Ritchie HWY	Suite 2A	Severna Park	MD	21146	Small Business	541330, 541590, 545120, 517210, 517410	PEAKE IS A TECHNOLOGY INTEGRATOR FOCUSED ON BRIDGING THE GAPS BETWEEN PEOPLE, TECHNOLOGY, AND OPERATIONS. Whether public safety, homeland security, DOD, business continuity or field operations, PEAKE specializes in taking care of all operational needs to ensure mission success. We have the experience and technology to provide enterprise services including O+M, network design and management, satellite system maintenance, and more. We integrate mission-critical technology, provide satellite service and network systems to ensure reliable, real-time communications, and even provide professional staff to operate and maintain it all. We pride ourselves on helping mission-focused personnel of any size and scope perform at their "PEAKE."	Jeff Lawn	443-951-1535		jlawn@peake.com
Pendaran Inc	http://www.pendaran.com	2790 Parkridge Dr.		Ann Arbor	MI	48103	Small Business	874-1, 874-4	Pendaran is the leading simulation Learning Company, specializing in Accelerated Experience Acquisition through "Flight Simulators" for Operations. Using the proprietary Pendaran Method, we develop simulation training programs to bring the benefits of a practice field to large, complex organizations, allowing them to rapidly learn to improve results and sustain the improvements. Pendaran has developed the first Flight Simulator for MRO, which has been successfully used in NAVAIR Fleet Readiness Centers.	Carol Michaelides	734-368-5242		carol@pendaran.com

Pentecom, LLC	http://www.pentecom.com	109 E Angelina		Palestine	TX	78501	Small Business, Woman Owned Small Business	541330, 518210, 541611, 561410, 611519	Pentecom is an award-winning business providing technical data consulting and document conversion services. Pentecom employs recognized industry experts in S1000D, the international specification for technical publications using a common source database, and other technical data standards who have supported a wide range of military and industry customers. Pentecom provides consultants that assist in the development of Data Module Requirements Lists (DMRLs), information sets, business rules, Business Rules Exchange (BREX), and other S1000D processes. Our staff is well-versed in eXtensible Markup Language (XML), Standard Generalized Markup Language (SGML), HyperText Markup Language (HTML), Portable Document Format (PDF), and word processing formats. We have successfully converted and tagged documents in compliance with a wide variety of standards and specifications including military specifications and other industry standard document and file specifications.	Kim Willmott	903-724-1156	888-209-6507	willmott@pentecom.com
Performance Aircraft Services, Inc	http://www.performanceacs.com	P.O. Box 612168		DFW Airport	TX	75261	Small Business, Woman Owned Small Business	488190	Performance Aircraft Services, Inc is a Woman-Owned Small Business, founded in 1993. We have numerous veteran partners in our company. We repair and certify both integral "wet wing" fuel tanks and fuel bladders. We utilize an AFRL/NAVAIR approved AquaStripping Process to remove legacy polysulfide sealants and install EF-5992 Polyurethane sealant in the fuel tanks. This sealant is 34% lighter than legacy sealants, and can reduce the weight of a C-130 by up to 800 pounds. EF-5992 is more flexible, and in AFRL testing, it withstood 1.4 million oscillations with no degradation. It will not dissolve in anti-icing agents such as DiEGME, and will not dry or crack when the wing tanks are empty. Most importantly, it does not allow oxygen to permeate it-which prevents most types of corrosion. NDI and eddy current testing can be done through this sealant.	Michael Aloise	972-574-4250		maloise@performanceacs.com
Performigence Corporation	http://www.performigence.com	P.O. Box 8574		Los Angeles	CA	90008-0574	8(a), Small Business, Small Disadvantaged Business	541519, 541611, 541330, 541614, 541512	Performigence helps customers address operations issues, solve logistics problems, manage programs, implement new technology and get work done. The 3D Enhanced Situational display provides the crew with 3D situation awareness along the route. CFIT is a thing of the past. 3D threat representation protects the crew from inadvertently exposing the aircraft to surround threats. Our mission planner enables the aircrew to plan/rehearse the mission on their desktop. Real-time re-plan the mission based on new mission parameters and optimize the route using the crew defined route planning parameters (Threats, Terrain, TOT, Population Centers, Highways, etc). Our route optimizer tool militarizes the mission planning tool output.	Robert Stadt	909-241-1308		ROBERT.STADT@SENTINELAPPLIEDTECH.COM

Sentinel Infrared Imaging, Inc	http://www.sentinel3.com	5320 Rosewood Lane		Vero Beach	FL	32966	Small Business, Veteran Owned Small Business	334511, 336413, 541618, 541690	Sentinel is a VOSB that consults for other primarily small businesses in getting them into markets. Shackleton Group Inc.	http://www.shkgrp.com	777 S Wadsworth Blvd	Suite 2-209	Lakewood	CO	80226	Service Disabled Veteran Owned Small Business, Small Business, Veteran Owned Small Business	541611, 511130, 518210, 541330, 541511	Shackleton Group, Inc. is a SDVOSB providing a wide range of Organizational Development Support. Marines founded SG 13 years ago to continue supporting the warfighter once out of uniform. We do that by providing NAVAIR programs added capability through unique and focused Organizational Development (OD). We apply OD systems expertise and tools to ensure optimization and implementation of strategic, structural and people-related organizational initiatives. Efforts are undertaken as determined via assessment and directed by leadership. SG will: Facilitate capture and publication of critical business processes to support the structure. Assess, provide recommendations, and assist in the implementation of desired behaviors, and develop associated products that support strategy/structure at each level of the organization. Provide leadership development training. Document OD products and include in Interactive Operating Guide and/or Charter housed in an appropriate Management Systems Library. Sue	http://www.ancatt.com	280 Quigley Blvd.		New Castle	DE	19720	8(a), Small Business, Small Disadvantaged Business, Woman Owned Small Business	541712, 541330, 325510	AnCatt developed the world's first heavy-metal free high performance anti-corrosion coating platform technology without using traditional heavy-metal anti-corrosion pigments such as chromium, lead, and zinc. Surprisingly this environmentally friendly anti-corrosion coating technology also can provide unprecedented anti-corrosion coating performance. Record-setting independent corrosion test already passed 13,000 hours of salt fog test and still no rusting or blistering. This coating also is also thin, light-weight, surface tolerant, easy-to-use, self-sealing, and protect all kinds of metals. AnCatt coating exhibited excellent adhesion test results. This next generation anti-corrosion coating inherent current coating structures, materials, and properties, therefore, very easy to adopt. This coating has been recognized as the first non-chromate that has outperformed the hexavalent chromium pigmented coatings.	Sue Wang	302-533-6533	302-689-4678	swang@ancatt.com

(TMB)	http://www.tmbhq.com	100 M Street, SE	Suite 400	Washington	DC	20003	Small Business	541330, 541611	Tech-Marine Business, Inc., (TMB) was established as a Woman-Owned Small Business in the Commonwealth of Virginia on July 7th 1997. Commitment to our customers' missions; Excellence in everything we do; Integrity in all our relationships – these are the principles which govern who we are and what we do. TMB was established to provide the Navy with program management support services. This is our core capability; this is what we do. Founded as "The Company Professional Program Managers Turn To" and today an Employee-Owned company, our capabilities and structure have matured as our customer requirements for program management evolved. Headquartered in Washington DC and with over 100 full-time employees, we have built our reputation providing focused support services to the Navy - primarily Naval Sea Systems Command (NAVSEA) programs and affiliated Program Executive Officers (PEO) and to the Office of Naval Research (ONR). TMB currently provides acquisition management, business financi	Thomas M. Dority	202-448-9764		tom.dority@tmbhq.com
