SPECIFICATION FOR

CLASS 2 INFORMATION

- (1) Class 2 products are for original equipment installations or high production only.
- (2) When a military procurement activity receives a military part number request for Class 2 products, the procurement activity must procure suitable Class 1 replacement products in lieu of the Class 2 items.
- (3) A Class 2 part is ordered by the manufacturers part number. Only that particular manufacturer's approved class 2 Tool can be used with the Class 2 part.
- (4) Class 2 products **will not** be stocked by the Defense General Supply Center for replacement purposes.
- (5) Class 2 products require qualification approval. Copies of the Qualifying Activity's approved part number listing must be obtained from the manufacturer. Class 2 products have the same periodic qualification requirements as Class 1 products. A verbal confirmation of a manufacturers qualification reference number for particular Class 2 product may be obtained from the Qualifying Activity.

This list has been prepared for use by or for the Government in the acquisition of products covered by the subject non-Government standard and such listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. This list is subject to change without notice; revision or amendment of this list will be issued as necessary.
