N3237918Q0001	No Range Specified	Competitive	N32379 NATEC					TBD	TBD		San Diego, CA	NATEC SPIRAL 3 Follow On For Telecom Services, OMN The purpose of the procurement is to provide Wireless Services and Devices (including cellular) for NATEC Navy and Marine Corps personnel, within the United States under a multi-year contract (base-options) to be executed in accordance with attached spending profile. This Multiple Award, Indefinite Delivery, Indefinite Quantity procurement is needed to ensure 24/7 mission critical support to NATEC and Fleet Aviation Customers is sustained without the interruption of wireless and cellular services, including devices. Services under this procurement cover usage in the 50 United States and while traveling internationally for members and employees stationed within the 50 States.		6.0 LOG	670000N
(LKE) F/A-18 & EA-18G ECP 6501	No Range Specified	Sole Source	N68335 NAWCAD-LKE					The Boeing Company: MO	St Louis, MO		Lakehurst, NJ	The Weapons Replaceable Assembly (WRA) 5 Test Adapter Breakout Box, part of 74D760518-1001 Test Adapter Set Support Equipment, is used to fault isolate and test the Radio Frequency (RF) paths within the EA-18G. During aircraft testing at the WRA 5 tray, the end item test set breakout box (74D765141-1001) is installed using the jackscrews; however, it is not adequately secured and movement during testing will result in inaccurate and inconsistent readings. Needed changes: 1. Modify the 74D765141-1001 Test Adapter Breakout Box to include a restraint feature similar to the ALQ-218 WRA 5 (C1001A9005-5) to ensure the WRA 5 Test Adapter remains secure during on-aircraft testing. 2. Add chamfer (.12" radius blend minimum) on the back corner of the WRA 5 Test Adapter Breakout Box to eliminate interference with, and damage to, the WRA 5 tray rub strip and allow easier installation.		PEOT	PMA-265

EP - Affordability Campaign Modification	No Range Specified	Post Award Competitive Action	N00019 NAVAIRSYSCOM_HQ					MCKINSEY & COMPANY, INC. WASHINGTON D.C.	WASHINGTON, DC	Other	As this effort has matured, the expansion and refining of the existing scope is required to continue delivering to the initial requirements awarded on the initial contract. The three areas being modified and evaluated are: a) Strategic Sourcing Support, b) SLT Offsite Support, and c) Major Contract Actions Support The Strategic Sourcing Support is being refined to focus on the Mission Capability (MC) requirement related to the supply chain and sourcing of materials. This refined scope will focus on how sourcing of materials is impacting the fleet's ability to reach and maintain an 80% MC rate. The SLT Offsite Support expansion of scope is related to taking the next step from the Organizational Assessment and linking it to the existing workforce skillsets. Finally, the Major Contract Actions support is moving into a different phase and requires more support from McKinsey in closing out the efforts to award the specific contracts	PEO JSF	JSF000

ISO 9001 SURVEILLANCE	No Range Specified	Post Award Competitive Action	N68335 NAWCAD-LKE						Government and Military Certification Systems, Inc	Washington, DC	Pax River, MD	The NAVAIR Fleet Readiness Center Mid-Atlantic (FRCMA) Voyage Repair Team Branch is a depot level emergent repair team tasked with completing all maintenance and overhaul of the Aircraft Launch and Recovery Equipment (ALRE) systems onboard US Navy aircraft carriers and air capable ships. Achieving ISO 9001 certification means to pass a physical ISO 9001:2015 certification audit by a registrar (a certifying agency). The proposed third party certification will enable VRT customers and command (NAVSEA, NAVAIR) to have assurance that the VRT Quality Management System (QMS) meets their requirements for compliance to ISO 9001:2015. In addition, the structured periodic surveillance audits over the 3-year contract will provide feedback to enable VRT management to comply with ISO requirements for continuous auditing and improvement of the VRT QMS. CTF	No Range Specified	Sole Source	N60530 NAWCWD_CLK						Jacobs Technology Inc.	Fort Walton Beach, FL	China Lake, CA	Provide upgrade, redesign, and operation of the current Launch Test Complex (LTC) at China Lake, CA, to include site re-activation, test and evaluation, support to enable fielding or deployment, as well as upgrade, design and fabricate a Test Payload Tube (TPT), Launch Test Stand (LTS), Launch Test Vehicle(s) (LTV), Advanced Payload Module (APM), Cross Flow (CF) Simulator and Control and Data Acquisition Next Generation (CDAS-NG). The redesigned LTC, now referred to as the Air Launch Test Complex (ALTC), will provide the air launch testing/capability to support the CPS program. This requirement is to also provide conceptual design and operation of an Under Water Launch Test Complex (ULTC), which will include providing estimated costs, technology maturity and estimates on build schedules. This data will be the updated basis for Government trade studies, or parametric cost estimates for the UWTC. This also includes design and fabricate a TPT, LTS, LTV, APM, CF Simulator and CDAS-NG.	4.0	470000D
